Sustainable Life Foundation

The Sustainable Life Foundation is a non-profit organization, created in 2003. It promotes, participates and informs about socio-environmental matters, environmental communication and education, development and responsible consumption.

Mision

Promoting and developing responsible lifestyles in society within our future on the planet.

Objective

To promote sustainable lifestyles among citizens to advance in the improvement of people's quality of life and the achievement of a healthier environment.

The **actions** are aligned with the values of **environmental respect**, an active policy in the defense and improvement of human rights, the right to access information, in compliance with labor standards, in environmental management, in the fight against child labor, the fight against all the many forms of corruption and transparency in financial management.

To guarantee the execution and monitoring of these criteria, the Foundation is **committed to the ten principles of the United Nations Global Compact** and has been preparing progress reports since 2005.

Since 2016, has been working to promote the achievement of **Sustainable Development Goals 3, 6, 7, 11, 12, 13, 14, 15 and 17** with projects aimed to promote sustainability.

About our projects:

We work in a responsible, transparent, respectful way, with constant learning and critical commitment, obtaining creative and quality results in:

- Sustainability for citizenship.
- Transition to sustainable food.
- Tools and analysis of ecological footprint calculations.
- Transition towards the sustainability of SMEs.
- History and evolution of lifestyles towards sustainability.
- Research on agroecological production and consumption and on the conservation of ecosystems.
- Aliados de la Vida Sostenible (Community of sustainable living people).
- Dissemination actions and corporate volunteering events.

Our firsts experiences in European projects:

2018 Participated as a collaborator in the Big Picnic Horizon 2020 European project, in support of the participation of the Real Botanic Garden Juan Carlos I of the University of Alcalá (Madrid), through the Critical Food Project.

2019 Participated in a LIFE Project, as a participant, in a working group on Lifestyles, in the event "Adaptation to Climate Change: Society, Education and Lifestyles". This event culminated in the development of a new National Plan for Adaptation to Climate Change (PNACC), for the period 2021-2030. In 2019 also participated as a silent partner of the European Academy Network Project, of the Europe for Citizens Program.

2020 Participated as a silent partner, in Erasmus + Projects KA2-Activation of Green Roofs Synergies as a tool for civic participation & environmental consciousness -AGROS and KA2-Web 2.0 for Hybrid Education.

The objective of participating in these projects was to know the European dynamics of projects related to sustainability and education, to begin to formally participate in projects from 2021. The Sustainable Life Foundation already has the profile created, with registration number E10266209.

Our experience in European projects:

2022 Members of the “LIFE AskREACH Project”

Promotion of consumer rights to information on chemical substances in articles, provided for in REACH, through technological tools” as a replicators.

In **2022**, Sustainable Life Foundation also join the European project ECF4Climate - *A European competence framework for a low carbon economy and sustainability through education*, as members of the Local Advisory Board and also of the International Advisory Board.

Our experience in European networks:

In **2022**, Sustainable Life Foundation joined the European Environmental Bureau (EEB) as an Associate member.
